SHOWER FOCUS

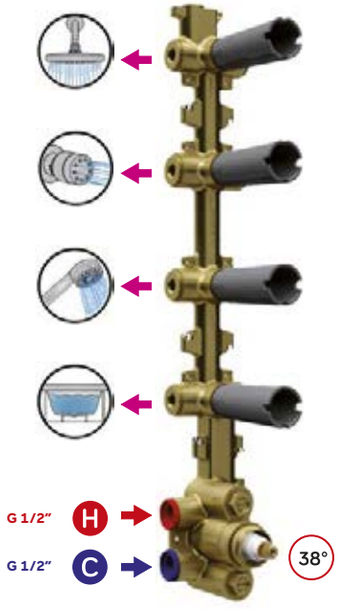

Zucchetti offre molteplici proposte per la personalizzazione dello spazio doccia, soluzioni tecniche in grado di rispondere ad ogni esigenza progettuale, scegliendo liberamente la collezione che meglio si addice allo stile del proprio bagno.
I miscelatori termostatici consentono di impostare la temperatura dell'acqua alla gradazione desiderata, di raggiungerla in tempi brevissimi e di mantenerla costante durante tutto il periodo di utilizzo, anche se si verificano variazioni di pressione o temperatura.
La valvola termostatica interna miscela continuamente acqua calda e fredda in modo da mantenere la temperatura in uscita costante, alla gradazione preimpostata.
Un dispositivo di sicurezza assicura che la temperatura dell'acqua miscelata non superi inavvertitamente i 38°C, temperature superiori sono raggiungibili solo mediante pressione di un tasto di sicurezza.
È una rubinetteria comoda, sicura, affidabile e vantaggiosa sotto il profilo del risparmio, sia idrico che energetico.

Zucchetti offers a wide range of solutions for the personalization of the shower area, technical solutions that meet any design needs, freely choosing the collection that best suits your own bathroom style.
Thermostatic mixers allow to set the water temperature to the desired gradient, to reach it in a very short time and to keep it constant throughout the period of use, even if pressure or temperature changes occur.
The inner thermostatic valve mixes hot and cold water, to maintain the constant output temperature at the preset scale.
A safety device ensures that the mixed water temperature does not inadvertently exceed 38° C, higher temperatures can be reached only by pressing a safety button.
It is a comfortable, safe, reliable and cost-effective mixer, in terms of both water and energy saving.
