ZUCCHETTI. CURA E MANUTENZIONE DEL PRODOTTO

Per mantenere a lungo i prodotti in perfette condizioni ed evitare depositi di calcare è importante effettuare una pulizia periodica ed accurata, secondo le modalità indicate.

Le superfici dei prodotti devono essere pulite con detergenti neutri delicati oppure con acqua e sapone.

Zucchetti consiglia di utilizzare in alternativa il prodotto Zetabrill (art. R99993).

Sciacquare sempre con cura le superfici per eliminare definitivamente i residui del prodotto di pulizia ed asciugare bene con un panno morbido, per prevenire il deposito di calcare.

È importante non utilizzare mai detergenti che contengano acido cloridrico, fluoridrico, fosforico, formico, acetico oppure candeggina o ammoniaca.

In caso di utilizzo di prodotti potenzialmente dannosi risciacquare immediatamente con abbondante acqua.

Non spruzzare mai i detergenti direttamente sui prodotti, ma vaporizzarli su un panno morbido.

Non utilizzare pulitori a vapore perché le alte temperature possono danneggiare i prodotti.

Non utilizzare spugne o spazzole con effetto abrasivo che danneggerebbero irrimediabilmente le superfici.

Si consiglia di evitare di lasciare a lungo sulle superfici residui di prodotti cosmetici o per l'igiene quali creme, saponi, lozioni, dentifrici, ecc.

PRODOTTI IN FINITURA VERNICIATA

Sulle superfici verniciate utilizzare solamente acqua eventualmente con l'aggiunta di detergenti neutri (pH 6,5 – 7,5) e caratterizzati da additivi leggeri. Non usare mai solventi o panni abrasivi.

PRODOTTI IN FINITURA PVD

Per le superfici in finitura PVD servirsi sempre di un panno imbevuto di detergente diluito e con pH neutro (6,5 - 7,5). Non spruzzare mai direttamente il detergente sulla superficie in quanto lo spray potrebbe lasciare aloni. Non utilizzare detersivi contenenti acido cloridrico, acido formico o acido acetico, o contenenti acidi o componenti abrasivi.

PRODOTTI IN ACCIAIO INOX

Per la pulizia di tutta la rubinetteria in acciaio inox si raccomanda l'utilizzo di prodotti specifici per la cura dell'acciaio inox. Possono essere utilizzati detergenti commerciali a pH neutro (6,5 – 7,5) e all'occorrenza, solo sulle parti in acciaio, alcool isopropilico o carbonato di sodio diluiti.

Non usare in particolar modo detergenti a base di acido clorico, fluoridrico, fosforico e muriatico.

SOFFIONI DOCCIA

Per il buon funzionamento nel tempo dei soffioni ed evitare l'accumulo di calcare si consiglia una pulizia regolare degli ugelli anticalcare, strofinandoli delicatamente con un panno morbido per favorire il distacco dei depositi.

AERATORI

Per avere sempre un buon getto di acqua si consiglia la pulizia periodica dei filtri degli aeratori, immergendoli (dopo averli smontati) in una soluzione di aceto diluito o utilizzando il prodotto Zetabrill (art. R99993).

Alcune finiture (C8, C3, C50, C51, C40, C41) possono variare o virare la tonalità nel tempo, perché sono soggette a ossidazione e mutano a seconda dell'ambiente in cui il prodotto è installato, all'utilizzo e alle proprietà dell'acqua. Questo implica che ogni prodotto può assumere un aspetto unico con il passare del tempo.

ZUCCHETTI. PRODUCT CARE AND MAINTENANCE

To keep the products in perfect conditions for a long time and avoid limescale deposits, it is important to carry out a periodic and thorough cleaning, according to the indicated methods.

The products' surfaces must be cleaned with mild neutral detergents or with soap and water. Zucchetti alternatively recommends to use the Zetabril product (code R99993). Always carefully rinse the surfaces to completely eliminate residues of the cleaning product and dry completely with a soft cloth to prevent limescale deposits.

It is important never to use cleaners that contain hydrochloric, hydrofluoric, phosphoric, formic, acetic acid, or bleach or ammonia. In case of using potentially harmful products, rinse immediately with abundant water.

Never spray detergents directly on the products but spray into a soft cloth.

Do not use steam cleaners, because high temperatures can damage the products.

Do not use sponges or brushes with an abrasive effect that would irreparably damage the surfaces.

It is recommended to avoid leaving residues of cosmetic or hygiene products such as creams, soaps, lotions, toothpastes, etc. on the surfaces for a long time.

PRODUCTS IN PAINTED FINISH

On painted surfaces, use only water, if necessary with the addition of neutral detergents (pH 6,5 – 7,5) and characterized by light additives. Never use solvents or abrasive cloths.

PRODUCTS IN PVD FINISH

For surfaces in PVD finish, always use a cloth soaked in mild, diluted detergent, with neutral pH (6,5 – 7,5). Never spray the product directly on the surface as the spray could leave halos. Do not use detergents containing hydrochloric acid, formic acid or acetic acid, do not use detergents containing acid or abrasives components.

PRODUCTS IN STAINLESS STEEL

To clean all stainless steel taps, it is recommended to use specific products for the care of stainless steel.

Commercial detergents with neutral pH (6,5-7,5) can be used and, if necessary, only on the steel parts, to use diluted isopropyl alcohol or sodium carbonate.

Do not use in particular detergents based on chloric, hydrofluoric, phosphoric and muriatic acids.

SHOWER HEADS

For a proper shower heads functioning over time and to avoid limescale accumulation, it is recommended regular cleaning of the anti-limescale nozzles, rubbing them gently with a soft cloth to help to detach the deposits.

AERATORS

In order to always have a good water jet it is recommended the periodic cleaning of the filters of the aerators, dipping them (after having removed them from the taps) in a solution of diluted vinegar or using the product Zetabril (code R99993).

Some finishes (C8, C3, C50, C51, C40, C41) may vary or change their tone over time. These finishes are subject to oxidation and change according to the environment in which the product is installed, to the use and to the water properties. This means that each product can take on a unique appearance over time.
